### Project description

Williams Landing is one of a number of new train stations being built in Melbourne's growing suburbs.

- Building new stations is an important, practical step to serve our growing communities. The stations will serve current and future public transport needs and help people access jobs, study and entertainment.

Williams Landing station will service a population that is expected to double in the next 20 years to 96,000 people, and reduce congestion at neighbouring railway stations.

### Project benefits

The new station will feature:

- a new bus terminal;
- a large long-term car park plus short-term (kiss and ride) and taxi parking;
- an island style platform between the existing passenger rail lines ;
- and
- pedestrian and bicycle access
